Ibuleve Gel - now proven to match the clinical effectiveness of oral ibuprofen¹

A newly published clinical study¹ demonstrates that Ibuleve Gel: Can match the speed and effectiveness of pain relief when compared to 3 x 400mg daily doses of ibuprofen tablets, whilst minimising the likelihood of side effects associated with oral NSAIDs and encouraging better patient compliance.

For clinically proven pain relief, believe in the power of Ibuleve

**New Tubifast Garments for use in
dressing retention, wet or dry wrapping**

Tubifast Garments provide a comfortable and easy to use method of dressing retention without the need for tapes, pins or ties.

Also, with atopic eczema now affecting 15-20%¹ of children in the UK, wet wrapping has become a valuable aid in improving sleep patterns and reducing hospital admissions.^{2,3}

By using Tubifast Garments' ready-made vests, leggings, tight socks and socks for wet wrapping, the skin is cooled and soothed, helping to reduce the itch scratch cycle. They may also help to increase the penetration of the topical treatments.⁴

Their two-way stretch construction ensures complete freedom of movement. They can also be worn under nightwear and ordinary clothes thus helping to promote fully active days and restful nights.

Tubifast Garments are now available on Drug Tariff. For further information on Tubifast Garments, call our Helpline on **01565 625172** or visit **www.skincareworld.co.uk**

PSNC to become a Ltd company

PSNC's committee is being enlarged to accommodate three more Company Chemists' Association members plus three independent multiple representatives in a bid to ensure better regional representation.

In addition, in a change to its constitution, PSNC will become a limited company, with the members, the chairman and chief executive appointed as directors. The new-look PSNC will comprise 31 members:

- seven CCA nominees (compared with the present four)
- one Co-operative Pharmacy Technical Panel nominee (as at present)

- five NPA nominees (as at present)
- three nominees from the Association of Independent Multiples
- fourteen regional representatives (representing independents)
- one elected Welsh representative, for as long as PSNC represents Welsh contractors. On devolution, the committee will have a total of 30 members.

At present there are 15 regional representatives, but some are from small independent multiples.

PSNC constitution working party chairman Dick Hazlehurst

said the aim was to include fair representation of all significant sectors of community pharmacy.

"The sectoral balance of PSNC has not kept up with the changing balance of pharmacy ownership," he said. "The way we all agreed on the principles of the new constitution was encouraging and shows that, most of the time, contractors from all sectors share the same interests."

The target date for implementation is April 2004, after PSNC has approved the exact wording of the Memorandum and Articles for the new company.

See *C&D* next week for details.

Scots seek voice in new RPSGB structure

Scotland must be adequately represented in any future organisational structure the Royal Pharmaceutical Society adopts to carry out its leadership role, the chairman of the Society's Scottish arm has said.

Scottish Executive chairman David Thomson was speaking after the publication of an RPSGB discussion paper last week, which called for views on future organisational models to allow it to carry out its professional leadership and regulatory roles in an integrated way. In addition, any models put forward should ensure that the Society could carry out both roles equally.

"We would favour our Scottish executive chair of the day being a member of Council with not just observation rights but with voting rights and a much better means to communicate and influence debate," said Mr Thomson.

Referring to a motion passed at the Scottish Executive's AGM in June, which called for the Society's Scottish arm to have the power to set policy for Scottish pharmaceutical and health matters, Mr Thomson said the Scottish Executive would "carry forward" the points raised in the AGM.

The Society's discussion paper puts forward three possible model structures. Two give Scotland and Wales a mechanism to input their views but may not necessarily give them voting rights.

The third model, which was initially put forward by Council member Clive Jackson in July (*C&D*, July 19, p6), combines elements from both the Council previously agreed model and the Save Our Society campaign's model.

PSNC constitution working party chairman Dick Hazlehurst

Dick Hazlehurst is the chairman of the PSNC constitution working party. He is a pharmacist and has been involved in the PSNC for many years. He is currently a member of the PSNC committee and is responsible for leading the working party in developing the new constitution for PSNC.

Technicians can study for degrees

A three-year degree course for pharmacy technicians will launch next month in the East Midlands.

The part-time foundation degree in pharmacy is aimed at hospital and industry-based technicians and covers topics such as therapeutics, medicines manufacture, pharmaceutical chemistry and pharmaceuticals.

Students will spend 14 study days at Nottingham's People's College while the rest of the learning and clinical mentoring will take place in the workplace.

In future it may be possible for foundation students to transfer to the second year of Leicester University's pharmacy degree.

Pharmacy Update Knockout: the final round

The end of the year is drawing closer and the pharmacists listed below are still in with a chance of winning the £2,000 prize in the *C&D* Pharmacy Update Knockout sponsored by Genus Pharmaceuticals.

GENUS PHARMACEUTICALS

We will be writing in the next week or so to all those who still have a 100 per cent score in Pharmacy Update this year with details of how we will find a winner for this year's event.

Peter Smith, Whitchurch, Shropshire;

Anne Overell, Belfast; Andrew Leighton, St Annes, Lancs; John and Jane Smith, Kings Lynn; Howard Glass, Manchester; Derek Isenberg, Lindfield, W Sussex; Tessa Jenns, Wimbourne; Julie Dubnewytsch, Sheffield; Stephen Howard, Sheffield; Lesley Keatley, Castlederg, Co Tyrone; Penelope Dando, Bampton, Oxon; Angela Goldman, Bruton, Somerset; Yvonne Waters, Portadown, N Ireland; Suzanne Cassells, Belfast; Nicola Tovey, Sittingbourne, Kent; Hazel Barton, Glasgow; Irene McCarty, Doncaster; Ann Ly, Dorchester; Ian MacKillop, Middlesbrough; Tara Arnold, Parkgate, Co Antrim; Janet Gratton, Newent, Glos; Bharti Mistry, Rugby; Raymond Hyde, Great Yarmouth; Michelle Warner, Ashington, W Sussex; Jennifer Jones, Plymouth.

Watch this space for more details.

Sodium valproate warning

Pregnant women should avoid taking sodium valproate as the infant is at a higher risk of congenital malformations, according to the latest *Current Problems in Pharmacovigilance*.

Women taking the anti-epileptic medication should receive specialist advice because of a

possible teratogenic effect, and if necessary they should take the lowest effective dose as monotherapy, in divided doses and, where possible, as a prolonged release preparation.

For more information:

www.mhra.org.uk

Drug naming proposal extended

The Medicines & Healthcare products Regulatory Agency has extended the deadline for stakeholders to respond to its proposal to ensure that UK drug nomenclature complies with European law.

Stakeholders now have until October 17 to comment on the MHRA's proposal to change UK drug names from British Approved Names (BANs) to recommended International Non-proprietary Names (rINNs), as used in Europe.

A key concern picked up by initial feedback was that dual naming and/or dual labelling of medicinal products for a transitional period was considered undesirable, said the MHRA. This is because manufacturers and pharmacists are not legally obliged to use both names on packaging or dispensing labels.

Another concern was that a transitional period where both names are used would prolong confusion and therefore a more clear-cut changeover was preferable.

Furthermore, following stakeholder support for the proposed legislative amendment to oblige dispensers to use the new rINN where the prescriber had used the former BAN without having to first contact the prescriber, the MHRA said it will now propose that this amendment comes into effect from April 30, 2004.

Scots launch e-mail news

The Royal Pharmaceutical Society in Scotland has launched an e-mail service to inform Scottish MPs of pharmacy issues.

Pharmacy Bytes will be issued up to five times a year and will incorporate information and news relevant to MSPs.

David Thomson, RPSiS chairman, said: "It is vital that we have an effective means to communicate with MSPs on matters relating to pharmacy. We intend to help MSPs by providing information on the future role of pharmacy and feedback on issues."

PCTs threaten backlash over Pfizer price increases

PCTs across the country are threatening a backlash against the recent double-digit increases in the prices of two popular prescription drugs.

Pfizer announced a 17.5 per cent price rise for its arthritis treatment Celebrex (celecoxib) and a 10 per cent increase for its calcium channel blocker Isthin (amlodipine) in July, but is now facing plummeting sales as PCTs from Cambridge to Hampshire lobby their GPs to switch to cheaper products.

East Cambridgeshire & Fenland PCT has written to GPs outlining the price increases, cheaper alternatives and the implications of Pfizer's move for the PCT. Pharmaceutical advisor Ron Smith believes the increases could cost the PCT an extra £50,000 a year if no action is taken.

"We have substantial numbers of patients on both drugs. They are popular drugs within their classes," he said.

Wandsworth PCT chief pharmacist Norman Evans admitted that the price increases had already impacted on prescribing costs data. "We have not finalised our strategy yet but we are already looking at high prescribers and asking them if there is a more appropriate treatment plan, given the cheaper alternatives. We might also look at other Pfizer products in other therapeutic areas and see whether we can make any savings there," he said.

"We are reluctant to start a campaign against Pfizer as we try to work together but the price increases on Isthin will cost us £100,000 that we have not budgeted for. The price increases are unfortunate, particularly when most prescribing budgets are under pressure and we are trying to find funds for drugs recently recommended by NICE."

New Forest PCT's chief pharmacist and primary care head, Dr Brian Curwain, said: "This

does annoy us and we feel it's a pretty poor show but our strategy is not to say 'you mustn't do this or that', but to make the situation clear to GPs, which is that Isthin alone will cost the PCT £40,000, and that other competitors are more cost-effective."

In relation to Celebrex, New Forest PCT said it already had concerns about the cost-effectiveness of Cox-2 inhibitors but does not expect GPs to switch people's medication "just because of price increases". The PCT will, however, be working with prescribing groups to stop the use of Celebrex as a first-line therapy, said Dr Curwain.

In response, Pfizer said the prices were changed in line with the UK's Pharmaceutical Price Regulation Scheme, which sets profit margins for pharmaceutical companies to ensure sustained research and development expenditure in the UK.

ETP may quicken payments

Quicker payment by the Prescription Pricing Authority could be one of the benefits offered by electronic transfer of prescriptions, PSNC has said.

Other benefits could be time savings and opportunities for improving stock management, PSNC said following evaluation of the ETP pilots (*C&D*, September 27, p5), which warned that the benefits of ETP could be hard to realise in practice and that costs might not be fully offset against the potential savings.

However, ETP also raises a number of issues, said PSNC, including the need for IT training for pharmacists and equipment upgrades. "It is essential that the National Programme for IT draws on the experience gained from the pilots and builds on this when developing the model for national roll out," said information officer Lindsay McClure.

Pharmacists should remember that ETP is only a small part of the bigger NHS IT jigsaw, with other aspects of the National Programme for IT, such as common electronic patient records and NHSnet, having the potential to offer far more benefits. "Access to the common electronic record and full connectivity to information and resources on the NHSnet network will be fundamental to pharmacy delivering new services and assuming new roles," said PSNC.

Of the ETP pilot consortia, Pharmacy2U's md Daniel Lee, said: "We are pleased the report

concluded that ETP is technically viable and are positive that it will allow pharmacists to be more fully integrated into the NHS."

TransScript's operations director, Martin Strange, said: "The pilots actively demonstrated that there are benefits for all the stakeholders including community pharmacists. In the short term, at the very least, ETP should reduce administration burdens, and in the longer term, information sharing should hopefully give pharmacists the opportunity to take on a broader role in patient care, as outlined in

Pharmacy in the Future.

"ETP is primarily an instrument for change, enabling other far more important developments, for instance freeing up pharmacist time for patient consultation and the provision of commissioned services, and must not be looked at in isolation."

TransScript, like Pharmacy2U, agrees that a common model, rather than one based on any one pilot model, is the correct way forward, but both expressed disappointment about the practical difficulties of ETP highlighted in the evaluation.

PRODUCT INFORMATION:

NUROFEN FOR CHILDREN and NUROFEN FOR CHILDREN SINGLES:

Suspension of ibuprofen 100mg/5ml. **Indications:** Reduction of fever, and relief of mild to moderate pain. **Dosage:** 20-30mg/kg bodyweight in divided doses, achieved as follows: Infants 6-12 months: One 2.5ml spoonful taken 3 to 4 times in 24 hours. Children 1-3 years: One 5ml spoonful taken 3 times in 24 hours. 4-6 years: 7.5ml (5ml + 2.5ml spoonful) 3 times in 24 hours. 7-9 years: Two 5ml spoonfuls 3 times in 24 hours. 10-12 years: Three 5ml spoonfuls 3 times in 24 hours. Not suitable for children under 6 months of age unless advised by doctor. For oral administration. For short term use only. **Contraindications:** Hypersensitivity to any of the constituents. Patients with a history of, or existing peptic ulceration. Patients with a history of asthma, rhinitis or urticaria associated with aspirin or other non-steroidal anti-inflammatory drugs. **Precautions and Warnings:** If symptoms persist for more than 3 days, consult doctor. Do not exceed the stated dose. Caution is required in patients with renal, cardiac or hepatic impairment. Asthma sufferers, anyone allergic to aspirin, receiving any other regular treatment and pregnant women should consult their doctor before taking Nurofen for Children or Nurofen for Children Singles. Nurofen for Children and Nurofen for Children Singles are not suitable for patients who have a stomach ulcer or other stomach disorder. **Side Effects:** Hypersensitivity reactions including (a) non-specific allergic reaction and anaphylaxis, (b) respiratory tract reactivity comprising of asthma, aggravated asthma, bronchospasm or dyspnoea, or (c) assorted skin disorders including rashes of various types, pruritus, urticaria, purpura, angioedema and, more rarely, bullous dermatoses (including epidermal necrolysis and erythema multiforme). Side effects rare may include abdominal pain, nausea, dyspepsia and gastrointestinal bleeding and peptic ulceration. Also very rarely thrombocytopenia. Bronchospasm may be precipitated in patients with a history of aspirin sensitive asthma. **Product Licence Holder:** Crookes Healthcare Limited, NG2 3AA. **Product Licence Number:** PL 00327/0085. **Legal Category:** P. **MRRP:** Pack size 100ml: £3.49. Pack size 150ml: £4.59. **Product Licence Number:** 00327/0140. **Legal Category:** GSL. **MRRP:** Pack size 8 sachets x 5ml: £2.79. Pack size 16 sachets x 5ml: £4.99. **Date of preparation:** August 2003. NFN570.

Questiontime

Sponsored by

UniChem

Last week we asked you:
"Who do you think should hold the NHS pharmacy contract?"
You replied (see right):

This week's question: A leading PCT chief executive has told the UniChem Conference that many PCTs have no idea of what pharmacists can offer. Which of the following can best promote pharmacists' worth?

- The Royal Pharmaceutical Society
 - PCT PEC pharmacists (and their equivalents in Scotland, Wales and N Ireland)
 - PSNC
 - Local area pharmaceutical committees
 - Individual pharmacists
- You can record your vote on our website: www.dotpharmacy.com. You have until noon on October 7 to cast your vote. We will publish the results in *C&D*, October 11.

What you told us

12am

8am

Nurofen for Children provides up to 8 hours effective fever relief in babies – up to 2 hours longer than any paracetamol suspension, and long enough to last all night long. It's also available in the very latest, convenient formats. When you need long-lasting, effective fever relief, Nurofen for Children's got it.

For up to 8 hours fever relief

 **NUROFEN®**

Tighter medicine supply controls predicted

European legislation could have a significant impact on wholesaling and medicines supply, Alliance UniChem's group deputy chief executive, Geoff Cooper, has warned.

While discounts to pharmacists have continued to rise regardless of the increasing consolidation of wholesaler capacity, there have been heightened concerns over safety, security and errors. "This means we are going to see a raft of European measures to introduce new procedures to control distribution and dispensing," he said.

"In Italy, for example, a law is being passed that proposes every single patient pack is individually tracked through the supply chain from factory to patient. And in five to six years, we expect each pack to be electronically tagged to aid tracking." This means that

wholesalers and pharmacies will have to continually upgrade their systems and procedures, and re-train their staff.

Mr Cooper also questioned the ethics of some generics manufacturers, describing the rapid take-up of generics in countries across Europe as "Christmas coming early".

"As a result, [manufacturers] are embarking on a 'land grab' to build market share by buying weaker generic competitors, by deploying large sales forces or by trying to follow value added strategy, such as developing bio-generic products."

However, he said that in the UK: "We have had the scourge of some plain old vanilla generics being presented as branded generics. We recently had the CEO of a generics company seriously trying to tell us it was ok

to cut pharmacists' discounts by a pound and reduce clawback to the Government by a pound in return for saving a PCT 20p."

Another area of concern was parallel imports, especially with differences between countries in northern and southern Europe. "Unscrupulous wholesalers prefer to make money exporting product and don't worry about service levels to their domestic customers. This, by the way, is one of the dysfunctional levels of a fragmentation of the wholesale sector in many southern markets."

However, PIs are presenting the European Commission with a dilemma. While officially the EC is in favour of PIs because of the principle of free movement of goods and services, unofficially it opposes them, as pharmaceutical companies are increasingly basing their R&D in the USA.

Contract update

PSNC's weekly update on the new pharmacy contract.

More than half of all prescriptions are for people over the age of 60 years and pharmacists have a vital role to play in ensuring that these patients take their medication properly, without unnecessary side effects.

Community pharmacies are accessible, convenient and highly valued by older patients.

The Older People's NSF states that patients over 75 years of age should have their medication reviewed annually and those taking four or more medicines should have a six-monthly review, and the enhanced services of the new pharmacy contract will encompass medicines use review.

For older patients, medication reviews have been shown to reduce the incidence of falls, by suggesting changes to the way drugs are taken and amendments to drug regimens such as the avoidance of long-acting hypnotics.

This service, together with the essential service of repeat dispensing, can help to make independent living for these patients more of a reality. Furthermore, the provision of compliance aids, as an additional service, will allow older patients to remain independent in their own homes for longer.

Community pharmacists, through the new contract, will have a disease prevention role via healthy lifestyle promotion, including opportunistic one to one counselling on CHD risk factors and the promotion of flu vaccination uptake, both services which will target older people. These are just a few of the services that the new contract has to offer.

Contractors will be balloted on the new pharmacy contract's service framework in the next few weeks. If it is accepted by contractors, PSNC will then move forward to discuss the fine detail of the contract specifications and the funding of the contract with the Department of Health and the NHS Confederation.

This is your pharmacy contract and your future – take the opportunity now to find out more about the proposed services framework.

WHOLESALE

New AAH asthma service

AAH Pharmaceuticals has added an asthma management package to its Vantage Health Watch range of medicines management services.

The service aims to enable pharmacists to utilise their skills in order to provide patients with a better understanding of their condition and to make the best use of their medicines.

Pharmacists signing up to the scheme will receive information on the diagnosis and assessment of asthma, as well as treatment options including both drug and non-pharmacological interventions.

AAH's marketing director, Dr Mandeep Mudhar, said: "This package will enable pharmacists to add to their professional services portfolio, raising the profile of their business whilst ensuring they are in line to receive recognition when the new remuneration system comes into effect."

To date, 121 pharmacists have signed up to at least one of the nine Vantage Health Watch services.

● AAH Pharmaceutical's 2004 Convention will be in Monaco from April 17-22, 2004.

New drug tendering service from NPA

by **Sasa Janković**

sjankovic@cmpinformation.com

The NPA is launching its NPASource electronic tendering, purchasing and spend management system this month free to members, which it claims "turns the traditional purchasing process for PIs, generics and dressings on its head. You no longer wait for offers – you tell suppliers what you need and they compete to give you the best value."

The service will be accessible by e-mail and fax, or on the internet at www.npasource.co.uk.

Users create a tender with a

pre-prepared product listing which is assigned a closing date and is only visible to suppliers, not other pharmacies. NPASource then e-mails suppliers who view the details and submit their quotes. The pharmacist can opt to allow each supplier to see the current best offer, allowing them to re-quote until the tender closes.

The pharmacist then selects the best quote and suppliers are notified. On receipt of the goods the pharmacist closes the purchase order and can settle the invoices direct through NPA Clearing House.

Members already using the facility under the EBS

BuyandSupply banner will be transferred automatically to NPASource.

NPA head of business support, Trefor Williams, said: "We have been working with EBS to develop the software to meet the needs of pharmacy."

"Unlike other online ordering facilities for generics and PIs in the dotcom era, we believe the tendering principle behind NPASource is sustainable. Unlike the early ventures, NPASource is going to be a slow burn and not an overnight success or failure."

For more information:

www.npasource.co.uk

Tel: 01786 458037.

Trefor Williams, NPA head of business support

SURVEY

Pharmacists feel poorly equipped for extended role

by **Sasa Janković**

sjankovic@cmpinformation.com

A survey of over 100 pharmacists conducted by Vicks has found that they do not feel they are equipped to perform an extended health practitioner role, despite Government plans to reinforce their role in primary care.

Fifty two per cent of the pharmacists surveyed felt mitigating circumstances

prevented them from providing a more advisory role. And of those respondents, 64 per cent felt lack of time was the major hindrance, with a further 8 per cent stating they were too short-staffed to take on new roles and responsibilities.

Eighty four per cent of respondents recognised that their role is evolving in some capacity, with the majority of

those feeling they are taking on more of an advisory stance.

Yet 56 per cent of pharmacists felt that customers don't know when they should seek advice from a pharmacist and when they should go to a doctor.

Further still, 46 per cent felt people don't recognise the full scope of their expertise – with most people only asking for advice relating to very minor ailments.

Call for entries

Organisers of The Queen's Awards for Enterprise are making a final call for more entries from the pharmaceutical sector before the application deadline of October 31.

Queen's Awards are made in three categories – International Trade, Innovation and Sustainable Development.

Any UK-based business unit with two or more employees can enter. There is no entry fee and entries can be made in more than one category.

To apply phone 0870 513 4486 or visit www.queensawards.org.uk to download an application form.

Get the net from Lloyds

Lloydspharmacy has joined with internet service provider Freeserve, to offer its customers the chance to sign up to Freeserve's AnyTime tariff, giving unlimited access to the internet for £9.99 per month for the first three months and £14.99 per month thereafter.

Minimum wage rise

From October 1 the national minimum wage rose to £4.50 an hour for adults and £3.80 for the youth rate.

Anyone who thinks they are not being paid the minimum wage should call the Inland Revenue helpline on 0845 6000 678.

RETAILING

Is mail order an option in the UK?

by **Charles Gladwin**

cgladwin@cmpinformation.com

Opposing views on mail order pharmacy were expressed at Alliance UniChem's annual conference this week in Dubai.

Group deputy chief executive Geoff Cooper suggested that there is little scope for a mail order operation to be run economically in the UK outside of the current wholesaler/pharmacy infrastructure.

"There simply isn't enough margin available," he said.

"Instead we see mail order, linked

to e-prescribing, developing as an additional channel for existing pharmacies, and wholesalers helping pharmacies to cope with the physical work involved."

However, Chris Town, lead negotiator of the NHS Confederation team and chief executive of Greater Peterborough PCTs, said that mail order could be a bigger threat to community pharmacy in the UK. "E-pharmacy is here to stay," he said. "It can either be picked up by the multiples and independents and developed as a local service, or it will inevitably

end up, as in the USA, operating out of a warehouse environment."

"As recipients of repeat medications often tell me, if there is no interaction with either the doctor or the community pharmacist other than collecting piece of paper, handing it over and receiving medication from a technician, why can't it just be delivered without any of those other interactions taking place?"

"I have to confess that, as somebody who works full-time, I am particularly attracted to this and so are many of my colleagues."

“UniChem Brand lets us compete with high street prices and still show a profit.”

Words of wisdom dispensed by Peter Badham of Badham Chemists, Bishops Cleeve

“Of course I want to make a profit. But I have to stay competitive if I want to survive – especially when competition is getting tougher by the day. That’s why I stock UniChem Brand products. I can offer my customers the same high quality products, at a much lower price than the brand names. And the great thing is, I can pass these savings on to my customers and still come out on top.”

To profit from our success, call us on 020 8391 7171 or visit www.unichem.co.uk

Delivering Healthcare

NPA welcomes all clear for Morrisons' Safeway bid

by Sasa Janković

sjankovic@cmpinformation.com

Trade and Industry Secretary Patricia Hewitt has decided an acquisition of Safeway by Asda, Sainsbury's or Tesco would operate against the public interest, but has given the go ahead for Morrisons to make a bid for Safeway provided 53 store divestments recommended by the Competition Commission are agreed.

The NPA has welcomed the news, with head of business support Trevor Williams saying: "Several NPA members already operate pharmacy concessions at Morrisons stores and Safeway pharmacists are NPA members as well."

"Of course any buyer of Safeway is bound to take a commercial view but we cannot imagine Safeway has been

anything but happy with operating community pharmacies and so we would be delighted to have them continue NPA membership.

"Safeway has been an important member to us and we have given them good value over the years."

Asda, Sainsbury's and Tesco may be allowed to bid for the Safeway stores which Morrisons would be required to divest.

Mrs Hewitt said: "I have considered carefully the Competition Commission's report and agree with their conclusions that an acquisition of Safeway by Asda, Sainsbury's or Tesco may be expected to operate against the public interest at both a local and national level."

A number of adverse effects were identified by the Competition Commission, including an increase in prices

over time, stemming from a reduction in the number of national supermarket operators from four to three."

In a statement, Morrisons said: "This decision supports our view that a merger of Morrisons with Safeway will create a strong fourth national food retailer to the benefit of customers, employees, suppliers and shareholders."

Chairman Sir Kenneth Morrison said: "We are pleased that the Secretary of State has cleared us in relation to Safeway. Merging with Safeway will allow Morrisons to accelerate the roll-out of its successful and popular retail format across the UK, providing consumers with a distinctive offering and unlocking the benefits of scale for shareholders."

RETAIL

Basic skills training in Surrey

Business Link Surrey and the Surrey Flagship Project are working together to provide fully funded, tailor-made essential skills training in reading, writing and arithmetic in the workplace and are particularly keen to assist the retail sector.

Helen Clark, head of business development for Business Link Surrey, said: "It is a hidden problem. Too many people are struggling with parts of their job ranging from answering the telephone to completing order forms, writing reports, using computers and stocktaking."

"Through the Surrey Flagship Project we are offering a totally fully-funded service assessing the skills people need to complete their jobs and then developing a tailor-made training package for every business."

INDUSTRY

Try to score in rugby competition

Health Perception, manufacturer of GlucOsamax and the GlucOsamine Gelpatch, is offering a pair of tickets including full hospitality to one of the Six Nations rugby matches at Twickenham in March, to the health store and pharmacy with the most creative window display on a rugby theme.

To enter, send a picture of your window along with your shop details to Helen Isaacs, Health Perception, Unit 12, Lakeside Business Park, Swan Lane, Sandhurst, Berkshire GU47 9D or e-mail helen.isaacs@health-perception.co.uk. Point of sale material and posters are obtainable by calling 01252 861454.

Entries close at the end of November and the judges, including David Wilkie MBE, Olympic gold medalist and managing director of Health Perception, and rugby international Lawrence Dallaglio, will announce their decision in December.

Abbott expands in Dartford

Abbott Laboratories has started construction of a £39 million biotechnology facility at its Murex manufacturing plant in Dartford, Kent. The expansion will create 125 new jobs, increasing Abbott's Dartford workforce to 410.

Murex already manufactures diagnostic products for testing blood for infectious diseases, in particular HIV and hepatitis. The expanded facility will be responsible for the initial stage of manufacture of 63 additional products used in testing for

conditions such as cancer, thyroid, hepatitis/retrovirus, cardiovascular, fertility/pregnancy, transplant and metabolic diseases.

The investment forms part of a five-year diagnostics expansion plan in Europe, with investment totalling £230m and the creation of 200 new jobs over the period, taking Abbott's total workforce in Europe to over 14,000.

PHARMA LASER

Straight in at No. 1

Following a highly successful launch campaign, including nationwide TV, Canesten Oral is now the fastest growing and most popular treatment for thrush, with a market share of 27%!

**Canesten Oral is back on TV in November so
stock up now to avoid disappointment**

Product Information for Canesten® Fluconazole Oral Capsule. Presentation: Canesten® Fluconazole Oral Capsule contains 150mg fluconazole. **Indications:** Treatment of candidal vaginitis, acute or recurrent. Also for treatment of partners with associated candidal balanitis. **Dosage and Administration:** Adults (16 – 60 years). One capsule. **Contraindications:** Hypersensitivity to fluconazole, related azole compounds or any of the excipients; co-administration with terfenadine or cisapride; pregnancy and breast feeding. **Warnings and**

Precautions: Adequate contraception necessary. A physician should be consulted if the patient or partner have had exposure to a sexually transmitted disease, or if the patient: Has had more than two infections of thrush in the last six months; is taking any medicine other than the Pill; has any disease or illness affecting the liver or kidneys or has had unexplained jaundice; suffers from any other chronic disease or illness; is uncertain of the cause of symptoms; has abnormal or irregular vaginal bleeding or a blood-stained discharge; has vulval or vaginal sores, ulcers or blisters; has lower abdominal pain or dysuria. In men, medical advice should be sought if: Sexual

partner does not have thrush; they have penile sores, ulcers or blisters; there is abnormal penile discharge; penis has started to smelt; dysuria. Patients should consult their doctor if symptoms have not been relieved within one week. **Side-effects:** Nausea, abdominal pain, diarrhoea and flatulence. Rarely rash, headache, hepatotoxicity and anaphylaxis. **Cost:** £12.50. **MA Number:** PL 00010/0282. **MA Holder:** Bayer plc, Consumer Care Division, Newbury, Berkshire RG14 1JA. **Legal Category:** P. **Date of Preparation:** February 2003. **Reference:** 1. IRI: Value share – four weeks ending 10th Aug 2003.

Comment

from the Editor

One of the more difficult things to do in life is stand back and make an objective assessment of how other people perceive you or your business. It's often an uncomfortable exercise. Research among users or purchasers of your services can paint a picture you might not recognise. It is important, though, to understand that this perception – however inaccurate or misguided – is the reality for those people.

In this context it is alarming to hear a leading PCT chief executive – the lead negotiator for the NHS Confederation in the new contract negotiations for England, no less – say that the vast majority of his colleagues have no idea what community pharmacies currently do (*see UniChem Convention report, p30*). "They have no idea of the potential you have..." says Chris Town, and describes this as a direct threat to our professional future.

He's right. His colleagues might be so ill-informed because they are submerged in NHS paperwork, and have never needed to find out. After all, managerial energy will never be wasted on the part of the organisation that works. And community pharmacy has been an extremely successful

public/private partnership. Too successful, perhaps, if today's generation of NHS managers know so little about it. But that is only half the story. Like it or not, Mr Town's comments indicate that the disjointed front of professional, trade and contractual bodies that represents community pharmacy is not effectively marketing the sector to a key client group.

With new 'contracts' for pharmacy services being discussed across the UK, it would seem one of the four Ps of the marketing mix needs addressing (*see Chapter 7 of Mind Your Own Business, delivered two weeks ago*). Product – the new contractual framework – is being hammered out, and so is the Price. Place is primary care, but Promotion to those who are going to buy pharmacy services needs more effort. Note to PSNC, SPGC and PCC...

Managerial energy will never be wasted on the part of the organisation that works

PAGB perspective

Sheila Kelly, director of the Proprietary Association of Great Britain, looks at brand names

OTCs and the power of brand loyalty

For many consumers of OTC medicines the familiarity of a brand name is a key reason for choosing a product.

In a recent survey of 1,000 people the research organisation Martin Hamblin found half of them agreed with the statement "I only use medicinal brands I know." Only 29 per cent disagreed. This preference for known brands was also demonstrated in answers to the statement "I like to try new over the counter medicines," where a massive 75 per cent of people disagreed and only 10 per cent agreed. Even price doesn't change this, as a recent *Which?* report showed (*C&D* September 13, p10).

If industry needed justification for its preference to launch new products as line extensions, these surveys provide it and it explains why products launched in this way are more likely to be

successful than brands which have a completely new name.

When it comes to medicines, pharmacists and doctors think ingredients, not brands, and get concerned that when a brand name is used for products with different ingredients consumers get confused.

Commonly, companies couple the brand name with another

descriptor showing what the indication is – such as cough mixtures for dry or chesty coughs. If the indication is the same, a further descriptor can highlight the differences such as non-sedating or long acting. It is common with products which have moved from POM to P to use the same brand name with a suffix showing a lower strength.

So what does all this mean to the consumer? A brand name is linked with a symptom and its relief. A long established brand may have been a family remedy, used by generations and trusted to be reliable and effective. The names have to be used within the same or similar therapeutic areas to make sense and they are signposts for a product that consumers don't buy very often.

While the industry wants to maximise the use of leading brand names, it doesn't want to do that if

it puts consumers at risk, so brand name proposals are screened for possible safety problems. Some line extension proposals get dropped at this stage, and all of them have to go to the MHRA.

Given that OTC products have to be safe in order to be OTC in the first place, it isn't surprising that when products which are line extensions are compared logically few significant safety problems arise. Those which do can often be addressed by good labelling and targeted advertising.

If there is a downside to all of this, the study showed that using familiar names might be concealing the considerable improvements in the efficacy of OTC products over the years.

If we want people to go to the pharmacy for common ailments then we need to improve these figures and that is what PAGB is working on doing at present.

Northern Ireland NOTEBOOK

What new contract?

Making it Better, the Northern Ireland pharmacy strategy, gives a clear commitment to begin negotiations between DHSSPS and PCC on a new pharmacy contract. This is needed for many reasons, not least because negotiations are already well progressed in Scotland, Wales and England and contractors here should not be left behind.

Judging from what GPs got in their new contract, and from discussions on the pharmacy contract for England, quality will be at the heart of our new arrangements.

Government policy is currently steeped in quality and while a pious aspiration in itself, this must not mean only more aggressive and more frequent inspections. It's bad enough now. I provide a quality service and my customers tell me so. I don't need to be assessed and monitored to prove it.

But will the contract in Northern Ireland differ from that

I provide a quality service and my customers tell me so

in Scotland, Wales/England? It could. It would be nice to think that we could develop a contract that really sets the standard for community-based pharmacy services now and for the future. The pharmacy contract should be designed for N Ireland, where we don't live in large conurbations.

Sadly, conservatism and vested interest pervades the current PCC and this could result in a contract not far removed from the current.

Those who run a chain of pharmacies will prefer to keep a contract that supports their business model and has favoured their expansion over recent years.

More of the global sum needs to be given to small volume contractors and less to high volume prescription factories. I admit I have a vested interest but then I have a right to be heard.

Written by a practising Northern Ireland community pharmacist

TOPICAL REFLECTIONS

Where is the solution to the pre-reg problem?

I used to be a pre-registration tutor but I have not taken on a graduate for a few years now. The increasingly stringent requirements of the Royal Pharmaceutical Society and, finally, the new student/tutor learning contract system with its extensive paperwork and emphasis on NVQ-style generic competencies over genuine experience eventually made me stop.

As an independent single-handed proprietor I am not alone. None of my colleagues presently tutors, even though some were, like me, active in the past. It is difficult for graduates to find pre-reg places at the moment and, as the three chief pharmacists of the home nations agreed at the British Pharmaceutical Conference in Harrogate, the problem will soon reach crisis point. The number of places being sought will increase as graduates from the new Schools of Pharmacy enter the system.

The pre-reg system has developed in a haphazard manner without much central guidance. It is driven by the commercial imperative for employers to train future pharmacists, and by the registration requirements of the RPSGB. Add the usual less than adequate resource support from the various national health departments and the prescription for the problem we now face is complete.

The RPSGB, private employers and the NHS have a responsibility to ensure that a uniform structured system of pre-registration training is available for them all. But no one sector can any longer provide the complex depth of experience required for today's pharmacist trainees.

More places, more resources and integrated training for both trainees and tutors can only be achieved by a new structured partnership of training between employers, the Society and NHS.

Targets and the law of unintended consequences

I liked Steve Dunn's quip about the law of unintended consequences (*C&D Sept 20, p32*), and have my own tale to tell. I have had a number of complaints in the past few weeks from patients unable to make an appointment with their GP. It seems that one of my local surgeries has changed its policy. It no longer makes appointments in advance and patients are being informed that they should phone on the day that the appointment is required.

If I were one of those patients I would be very annoyed. Fortunately I was able to view my patients' problems with a degree of detachment. It seemed a bit crazy, but it really was an issue for the practice to address. Then I read about the queues at A&E and the light dawned. Some hospitals are now operating a queuing system

for patients brought in by ambulance. The reason is the Government target that no patient should wait more than four hours from arrival in A&E to admission, transfer or discharge. To achieve that target less serious patients are left in the ambulance. Since they have not entered A&E the clock is not ticking. So a queue of ambulances forms outside the hospital that cannot be used for other emergencies. But the target has been achieved.

In the case of my local GPs, they must provide an appointment within 48 hours. Make an appointment next week and they have missed their target. QED, appointments can only be made on the day they are required. The target has been met. But at least I can now provide my angry patients with a rational explanation.

Serious accusation or merely a cock-up?

So former RPSGB Council member Mark Koziol thinks that the Society has been "sexing up" its response to motions voted on at the Branch Representatives Meeting (*C&D Sept 27, p4*). The Society has promised an investigation into how the response agreed by Council metamorphosed into something different upon publication. The Hutton Inquiry has been a model of transparency. Will the Society break with tradition and give us all an insight into who makes the decisions and how at Lambeth? Could pharmacy really have its own Campbell, Hoon and Gilligan? Personally I think it is more likely to be cock-up rather than conspiracy.

Bipolar disorder, or manic depression as it was formerly known, can be a severe mental illness. *Vanessa Sherwood* looks at the disease and its treatment

Poles apart

THE COLLEGE OF PHARMACY PRACTICE

This course (module 1283), in association with multiple choice questions being published in C&D November 1, provides one hour's continuing education

Bipolar disorder (BD) is characterised by recurrent episodes of depression and mania or hypomania. The disease occurs most frequently in creative people: Spike Milligan, Lord Byron, Sylvia Plath and Vincent van Gogh were all sufferers, as was Winston Churchill who famously described it as his "black dog".

Prevalence

Affecting at least 1 per cent of the population, BD occurs equally in men and women. Some estimates suggest a lifetime prevalence as high as 1.6 per cent so there are probably at least 550,000 patients in the UK.

BD is most simply classified as:

- **Bipolar I** – where patients have had at least one full manic episode and also a depressive or hypomanic episode.
- **Bipolar II** – patients have not had a full manic episode but suffer from recurrent depressive and hypomanic episodes.
- Simultaneous mania and depression can be present (mixed episodes).
- Rapid cycling is the phrase used to describe at least four episodes of mood disturbance in 12 months.
- Rapid cycling is the most disruptive form of bipolar disorder and is the only distinct classification of the disease that is more common in women.
- However, it can also be associated with the use of tricyclic anti-depressants and hypothyroidism.
- Patients with BD have a mortality rate two to three times higher than the general population.
- About 10-20 per cent of patients take their own life and nearly a

third of patients admit to at least one suicide attempt.¹

The peak age of onset is between 15 and 24 years, but often with an interval of five to 10 years before diagnosis is confirmed. If the onset of symptoms occurs after the age of 60 then the condition is probably secondary to other causes.

Symptoms

Manic symptoms include:

- heightened mood, exaggerated optimism and self-confidence
- decreased need for sleep without fatigue
- grandiose delusions, inflated sense of self-importance
- excessive irritability, aggressive behaviour
- increased physical and mental activity
- racing speech, flight of ideas, impulsiveness
- poor judgement, easily distracted
- reckless behaviour such as spending sprees, rash business decisions, erratic driving, sexual indiscretions
- in severe cases, hallucinations.

In hypomania symptoms are similar to mania but not as severe and the person can function in occupational or social situations. Manic episodes occur less frequently than depressive episodes but during a manic episode patients are a high risk to themselves and others.

Unipolar depression

- prolonged sadness, unexplained crying spells

Objectives

- To understand the classifications of bipolar disorder
- To revise the symptoms
- To review possible causes
- To revise treatments for bipolar disorder
- To be aware of the importance of patient compliance

Gwyneth Paltrow as the American poet Sylvia Plath, who suffered from bipolar disorder, in the BBC film *Sylvia*

Continued on page 20 ►

changes in appetite and sleep patterns
 irritability, anger, worry, agitation, anxiety
 pessimism, indifference
 lethargy
 feelings of guilt, worthlessness
 inability to concentrate, indecisiveness
 social withdrawal
 unexplained aches and pains
 recurring thoughts of death or suicide.²

Irritability, aggressive behaviour, agitation, racing speech and anxiety can all be symptoms of depression

abnormalities are of particular importance in patients with rapid cycling – they have a much higher frequency (25 per cent) of hypothyroidism than other patients who are suffering only from depression.

Genetic factors play a part too. The lifetime risk for first degree relatives is 5–10 per cent (but 40–70 per cent for identical twins) but the mode of inheritance is complex, involving several genes. Genetic factors probably only have a small effect; environmental and developmental disorders are also thought to be important in the cause of the disorder.

Diagnosis

Diagnosis can be problematic and drawn out for a number of reasons. Patients may delay seeking help or may only present during a single episode of the illness without reporting any previous mood swings. This can lead to misdiagnosis, with possible inappropriate prescribing, which can further exacerbate symptoms.

The difficulty in diagnosing BD has not been helped by changing views on causes, diagnosis and treatment. There are also differences between the European and North American approach to the disease.³

Treatment

The prevention of recurrences and the acute management of depressive and manic episodes are the major goals of treatment.

If uncontrolled, BD may become progressive, with mood fluctuations becoming more frequent, more severe and less responsive to medication.

For the last 40 years lithium has been the mainstay of treatment for acute episodes and prophylaxis of manic or depressive episodes.

Other drugs prescribed include anticonvulsants, first generation “typical” antipsychotics, and recently atypicals as well as antidepressants for depressive episodes. These may need to be prescribed together to stabilise all elements of the disease. Treatment is usually started in hospital

following admission for an acute manic or depressive episode.

Acute mania

Lithium

Lithium is the most effective long-term preventive treatment and the first choice for an acute manic episode. However, it has a high potential for toxicity and adverse effects. There is no evidence that one lithium salt, for example, carbonate or citrate, is better than the other and its mechanism of action is uncertain.

Doses should be adjusted following monitoring and are usually halved initially for elderly patients. Serum lithium levels above 2mmol/litre are usually associated with serious toxicity.

The use of lithium and its side effects has been covered recently in an *Update* case study.⁴

As lithium can take up to a week for a full therapeutic effect, benzodiazepines may be prescribed concurrently. Where there is severe mania or additional psychotic symptoms such as hallucinations, delusions or aggression then antipsychotics may also be required.

Valproate semisodium

This is found to be useful in patients unresponsive to lithium for the treatment of acute manic episodes. Sodium valproate has been used to treat mania, outside its product licence, and the two drugs are not bio-equivalent.

Valproate semisodium differs from sodium valproate in that it is a complex containing sodium valproate and valproic acid in a 1:1 molar ratio. It is the first valproate salt licensed for the treatment of acute mania in the UK, as Depakote. The exact mode of action is unclear but it may potentiate the inhibitory action of gamma amino butyric acid. The initial dose is 750mg daily in two to three divided doses, increased according to response, with a usual dose of 1–2g daily. Patients may respond within one to four days.

As with sodium valproate, liver function should be monitored before and during the first six months of therapy as

there is a risk of liver toxicity.⁵

Carbamazepine

This was the first anticonvulsant licensed for mood stabilisation and, like lithium, it has a delayed onset of action. It has an antimanic effect comparable to the antipsychotics but without the extra-pyramidal side effects (EPS). Carbamazepine may be used for the prophylaxis of bipolar disorder in patients unresponsive to lithium; it seems to be particularly effective in patients with rapid cycling. It has an initial sedative effect, which may be an advantage, but has a high potential for interactions. The dose is initially 400mg daily in divided doses, increased until symptoms are controlled; the usual range is 400–600mg daily; maximum 1.6g daily.

Lamotrigine

The US Food and Drug Administration has recently approved the use of lamotrigine for the long-term maintenance treatment of bipolar disorder, as an additional therapy to delay the occurrence of a manic or depressive episode.⁶ Its effectiveness as a treatment for an acute episode has not been established.

Recent guidelines from the British Association of Psychopharmacology suggest that lamotrigine is more likely to prevent a depressive rather than a manic episode.³ A dose of 200mg daily was found to be effective in the trials on which the FDA's approval was based.

Some studies have also shown that gabapentin and topiramate could also be effective long-term treatments. Until further evidence is available the use of these drugs will probably be reserved for refractory cases, as none are licensed for BD in the UK.

Typical antipsychotics

Haloperidol and chlorpromazine exert a rapid and powerful effect in all manic states and can be used to sedate severely disturbed patients, whether the disturbance is due to mania or psychosis. But the high frequency of neurological (tardive dyskinesia, EPS) and mental side effects means they should be given only for a limited period and in combination with mood stabilisers such as lithium. The antipsychotics can then be withdrawn once lithium is having its full therapeutic effect or when psychotic symptoms have subsided.

The dose for chlorpromazine

Continued on page 22

NICE guidelines

The National Institute for Clinical Excellence published its guidelines for olanzapine and valproate semisodium in the treatment of acute mania associated with bipolar I disorder.⁷

NICE's guidelines state that olanzapine and valproate semisodium are “recommended as options for the control of acute symptoms associated with the manic phase of bipolar I disorder”.

NICE also suggested that the choice of treatment should be a joint decision between patient and their clinician, using an advance directive and consulting the patient's advocate and/or carer if it is not possible to obtain the patient's consent at the time.

The Institute estimated that the overall costs of olanzapine and valproate semisodium are similar to those for alternative treatments.

The National Collaborating Centre for Mental Health, part of NICE, is developing full guidelines for the treatment of bipolar disorder, which are due to be published in 2006.

SANDOZ

Think Generics

initially 25mg three times daily (or 75mg at night), adjusted according to response, to a usual maintenance dose of 75-300mg daily. The haloperidol dose is initially 1.5-3mg two to three times daily.

Atypical antipsychotics
Clozapine and olanzapine show antimanic properties as well as antipsychotic properties, but with a far lower risk of neurological side effects than the typical antipsychotics. Olanzapine is licensed in the USA and the UK for mania; risperidone is not licensed for mania but is licensed for psychosis. Olanzapine was granted a UK licence for use in adults over 18 last year.

Doses for olanzapine are: combination therapy for mania, 10mg daily adjusted to usual range of 5-20mg daily; doses greater than 10mg daily only after reassessment. In monotherapy for mania, 15mg daily adjusted to usual range of 5-20mg daily; doses greater than 15mg only after reassessment.

Bipolar depression

If a patient with BD has a "breakthrough" episode of depression, despite continuing mood stabilisation treatment such as lithium, then that depression is frequently long-lasting and severe with a pronounced suicide risk. Almost all antidepressants effective in the treatment of "unipolar" depression are used in BD but bipolar patients may not respond as well. Treatment, particularly with tricyclics, has a risk of a rapid switch to mania, or can induce or accelerate rapid cycling. If the patient is not taking a mood-stabiliser, lithium should be initiated for depression and if there is no response then an antidepressant should be added. SSRI antidepressants, as well as having a lower side effect profile than tricyclics, may be less likely to induce mania or rapid cycling.

Non-drug treatment

Other treatment strategies include

electroconvulsive therapy and psychotherapy. Although there is a stigma attached to ECT treatment, possibly owing to its coverage in the popular press, ECT is one of the best proven treatments in acute manic states. It can also be used where pharmacotherapy is contraindicated.

With the advent of effective drug treatments psychotherapy has become less common for bipolar disorder but specific therapies can be a useful addition in some cases, for example in improving patient medication compliance, acceptance of the illness, and modifying environmental risk factors such as stress, which can be a trigger for manic episodes.

Developments

BD has a stronger tendency to run in families than have clinical depression or schizophrenia. Recently, a single gene that accounts for up to 10 per cent of BD cases has been identified. This is important because many psychiatric conditions are multi-genetic.

The gene GRK3 is thought to play a role in regulating the way the brain responds to dopamine. In BD the gene may be activated inappropriately or turned off when it should be working, meaning sufferers become hypersensitive to dopamine, leading to extremes of mood.

Dr John Kelsoe at the University of California, San Diego, said that discovering the gene defect may lead to new, targeted therapies to treat BD.⁸

Pharmacist's role

Patients with bipolar disorder will probably have had their treatment initiated in hospital and so it is important for community pharmacists to be aware of the brand prescribed for lithium. They should make sure that patients have a lithium card and are aware of the importance of regular monitoring, fluid intake

Actionplan

1. Using your patient medication records, trace patients who are taking drugs listed in Section 4.2 of the *BNF*. Estimate what proportion of all your patients take these drugs.
2. How many are probably suffering from bipolar disorder?
3. How well are they controlled?
4. Do these patients receive polypharmacy? Is their drug regimen sensible and in the patient's best interests? If not can/should you interfere?
5. The self-destructive urge is high in many patients suffering from any psychotic/depressive illnesses. Think how you could help in this difficult area.
6. Is there anything you could do to help identify patients suffering from bipolar disorder so they might be diagnosed more quickly?
7. Try to find the differences between mania and psychosis.

and the potential for interactions with OTC analgesics.

With the extending and wide range of indications for anticonvulsants and atypical antipsychotics, pharmacists may want to be sure of a patient's diagnosis before offering any counselling on potential effectiveness of treatments.

Encouraging patient compliance with medication, perhaps by offering medication dosage systems, may help a person with BD from suffering a manic or depressive episode and reduce the need for hospital treatment.

Help bring smoking to a full stop ●

COPD challenge to pharmacists

Pharmacists can play a greater role in identifying patients with chronic obstructive pulmonary disease (COPD) within their community, says a respiratory medicine professor.

By asking three simple questions, pharmacists can identify undiagnosed COPD patients and encourage them to seek medical attention from their GP, says Professor Paul Jones from St George's Hospital, London.

Recurrent chest infections during the winter, getting breathless during simple activities and the presence of a smoker's cough are all indicators of COPD, and pharmacists can easily ask customers these questions, says Professor Jones.

Including spirometry as a pharmacy service, like blood pressure testing, is another way that pharmacists can be proactive in COPD treatment, he adds. A small desktop device which is straightforward to use, says Professor Jones, could lead to a significant impact in identifying COPD cases and helping sufferers receive treatment earlier.

Another area where Professor Jones believes that pharmacists can play a vital role in is training and retraining patients to use inhalers every time they come in for their repeat prescriptions. This helps to stop bad habits forming and means smoking cessation, which is a vital part of treating COPD, is not forgotten.

In the UK, more people die of COPD than of stroke and it is the only major cause of death that is increasing in the UK. The British Lung Foundation has published a booklet in conjunction with Allen & Hanburys to promote awareness of COPD.

● Community pharmacists can improve asthma control through self-management programmes, according to a study in *Thorax*.

A group, which received self-management advice from pharmacists along with telephone follow-up for three months, saw an improvement in their symptoms, compared with the control group whose symptoms worsened.

More people die of COPD in the UK than of stroke and the trend is upwards

Antacids alleged to cause food allergies

The Proprietary Association of Great Britain has refuted scientists' claims that antacids can cause food allergies.

PAGB issued a statement saying that OTC indigestion remedies are safe and effective.

Helen Darracott, PAGB's director of legal and regulatory affairs, said: "Indigestion remedies have been used for many decades by millions of people to relieve heartburn and other

indigestion symptoms safely and effectively without issues."

The scientists from the University of Vienna claim that antacids are suppressing acid production, and hence protein digestion, within the stomach and food is entering the small intestine not fully digested. They claim this undigested food triggers an allergic response to it.

The study investigated the effects of omeprazole, ranitidine and sucralfate in mice and discovered their antibody levels

were higher after taking antacids.

The Medicines and Healthcare products Regulatory Agency said: "The MHRA has not received any reports of an association between the use of medicines such as ranitidine and food allergy... as with all medicines on the UK market, we will continue to monitor the safety of ranitidine and other related medicines used for treating patients with increased gastric acid."

Simvastatin best at night

Simvastatin is best taken at night, according to a trial in Sunderland.

Patients who took either 10mg or 20mg simvastatin at night achieved a greater lowering of their cholesterol than those who took it in the morning, according to the report in the *BMJ*.

This is said to be because cholesterol and low density lipoprotein concentrations are greater when it is taken in the morning.

Scriptlines

Glutafin extends range

Glutafin is introducing two new products to its gluten-free range: Crisp Rolls and Crisp Breads. The Crisp Rolls are wheat, gluten and egg-free and the Crisp Breads are also milk-free.

Both the Crisp Breads and Rolls are cellophane-wrapped and are available on prescription for those with coeliac disease and dermatitis herpetiformis.

Price: £3.50

Occlusal still available

DermaPharm is still producing Occlusal (26 per cent salicylic acid in a polyacrylic vehicle) wart and verruca treatment, contrary to a message that pharmacists may have received from their wholesaler. Stocks of the product are available again after a brief interruption during the summer.

For more information:

DermaPharm

Tel: 020 8399 3040.

SPC changes

The SPCs for Deseril tablets (methysergide) and Naseptin nasal cream (neomycin 0.5 per cent and chlorhexidine 0.1 per cent) have been updated.

Concomitant use of Deseril with

cytochrome P450 3A (CYP3A) inhibitors, such as macrolide antibiotics, HIV protease or reverse transcriptase inhibitors, azole antifungals or cimetidine, must be avoided. This can lead to an elevated exposure of methysergide and ergot toxicity (vasospasm and ischemia of the extremities and other tissues).

Alliance Pharmaceuticals warns that Naseptin contains peanut oil (arachis oil) and therefore should not be taken/applied by patients with a known allergy to peanuts. Patients with an allergy to soya should also avoid Naseptin as there is a possible link between a soya allergy and an allergy to peanuts.

For more information:

www.medicines.org.uk

Stoma care products

CliniMed is launching two stoma care products. HydroFrame flange extenders are available in packs of 20 and are available on NHS prescription. These are gentler, easier-to-use flanges for "picture-framing" hydrocolloid flanges.

HydroFrame flange extenders use a hydrocolloid adhesive to avoid adverse reactions to strong adhesives and to keep the area dry.

Also available are FreeStyle Oval colostomy pouches in packs of 30 in either beige or clear.

For more information:

At a loss as to what products to stock in your Pharmacy

Dear Debbie

I'm a successful chemist, interested in high quality products for my customers. These products need to be exciting, innovative, sell well and at the same time give me a good profit margin. I've heard that weight loss products are good but there are so many out there to choose from. Can you please point me in the right direction?

Debbie Says

Why not try investing in our 100% natural, herbal thermogenic slimming supplement, **Thermoslimmer**. This product will be accepted quickly by your customers as it has a fantastic reputation, making it one of the best selling weight loss products to date. In addition SHG plc, the importers and distributors of Thermoslimmer are able to offer you an unbelievable package that includes: A money back guarantee, Free local and national advertising, Free point of sale material, Free "A" board, Free training, Technical back up and support, Next day delivery and an informative website. All that and a great profit margin (our average stockist's current profit per week can reach in excess of £500). Now that's what I call **amazing**.

Thermoslimmer Nightslimmer & Thermoslimmer for Men

100% Natural Herbal Dietary Supplement
Specially Formulated for Men and Women

Breath tester to help quitters monitor CO levels

A device that measures the levels of carbon monoxide in the body is now being distributed through pharmacies for people to use at home as part of their own smoking cessation programme. The Smokerlyzer System includes a personal carbon monoxide breath tester to help quitters monitor their CO levels as they give up smoking. Based on a clinical measuring system, the test uses the same technology as the health professional breath CO monitors which have been used in smoking cessation clinics for over 10 years. The system is made by Bedfont

Scientific which manufactures gas monitoring instruments and specialist calibration gas mixtures for medical, scientific and industrial markets.

The tester helps quitters estimate the level of their nicotine dependence and therefore select an appropriate treatment plan. The system also includes a quit manual that covers all three stages of the quit process - Diagnosis & Preparation, The Action Plan and Relapse & Prevention.

Price: £39.95

Bedfont Scientific Ltd

Radian-B TENS sends signal to pain

Ransom Consumer Healthcare is introducing an easy-to-use TENS machine into the Radian B range.

Radian B TENS is designed as a natural, drug-free pain relief system for relieving ongoing aches and pains.

The compact machine sends electrical signals through electrodes on the skin to act directly on the nerves, stimulating the body's own natural defences against pain.

The manufacturer says the system offers a solution to consumers whose lifestyles are impacted by serious ongoing pain and who want to reduce reliance on painkillers.

The machine features dual channel with individual channel intensity control, seven pre-set programmes, session timer with countdown indicator and auto shut off, low battery warning indicator. It has a one-year warranty and comes with electrodes, batteries, storage pouch and instructions.

Panadol gets tough and packs a punch

GlaxoSmithKline Consumer Healthcare is relaunching Panadol in a crush-resistant pack designed to appeal to younger users - especially women.

Panadol Compack is a tough plastic wallet pack that can be carried in a pocket or handbag.

The metallic-finish pack has rounded edges and clicks open to reveal both the tablets and patient information.

The packs will be introduced for the Panadol variants most likely to be purchased for pain relief on the move - Panadol tablets (16s), Panadol Extra

(16s) and Panadol ActiFast (14s).

Eye-catching point of sale material is available.

● Panadol ActiFast is on TV this month supported by a £1 million advertising campaign until early November.

The commercial features 'fast cars', 'fast food' and 'fast lane' - linking the speed of life with the speed of pain relief offered by the product.

Price: Panadol tablets 16s £1.99, Panadol Extra 16s £2.29, Panadol ActiFast 14s £2.49

Glucose meter is a Breeze

Bayer Diagnostics is launching an easy-to-use blood glucose meter into its Ascensia line of diabetes care products.

The Ascensia Breeze is designed with single function buttons to make it convenient and simple to operate. It features the Glucofacts PC download function and uses the Ascensia 10-test disc, eliminating the need to handle individual strips.

The meter has been developed with 'Sip-in sampling' technology to help eliminate testing error, with only a tiny blood sample needed.

Profoot goes soft on feet

Profoot is launching a new range of footcare products which include polymer gel dressings to help prevent friction and relieve pressure on tender areas.

The Profoot Soft Gel range includes Corn Wrap, Toe Protector and Toe Spreader.

Corn Wrap is a toe sleeve that fits completely around the toe for a snug and comfortable fit and can be stretched to fit any toe. The gel-lined wrap relieves pressure on the skin, minimising the pain caused by corns. The mineral oil in the polymer gel moisturises the skin, helping to soften calloused feet.

Toe Spreader provides relief from painful bunions, sore toes and corns between the toes. Placed

between the toes, the spreader can also help to re-align and provide pain relief from overlapping toes.

Toe Protector is a transparent sore toe reliever that will fit any size toe. It is designed to slip over the toe to provide relief from corns, sore toes and toe curl.

The Profoot range is being supported by a £500,000 promotional campaign.

Price: Corn Wrap £2.99 (three per pack), Toe Spreader £1.99 (one per pack), Toe Protector £2.99 (one per pack) Pip code: Corn Wrap 298-2346 Toe Protector 298-2353, Toe Spreader 298-2361

'Perception is reality' is a theme that ran through the opening session of the UniChem 2003 Convention taking place in Dubai this week. A range of stakeholders told delegates some home truths about how pharmacy is seen from the outside, as well as how pharmacists can contribute to the future health of the population

Don't assume you will have a role as of right

Many of the services that could be provided by pharmacists and their staff could also be done by others, a leading PCT spokesman has warned. "Although we have a skill shortage, I suspect that, over time, that will change as jobs and opportunities become more interesting and hopefully pay rises match this. Do not therefore assume that it is yours as of right," Chris Town, chief executive of the Greater Peterborough PCTs, who is also the lead negotiator for the NHS management side in the current pharmacy contract negotiations, told delegates.

"A direct threat to the pharmacy profession is that the vast majority of my colleagues have no idea what you currently do other than in a very broad sense," he said. "I am absolutely convinced that they have no idea whatsoever of the potential that you have for addressing many of the challenges."

"If you haven't already got a pharmacist on the professional executive committee of the PCT, I would urge you to do so. We, in the contract negotiating team, have been anxious to ensure that, as the new contract rolls out, there are people with adequate skills within each PCT, and, to me, it is essential that as part of the team there is a qualified community pharmacist who understands the rules."

One of the challenges to address in the new agenda relates to pharmacy premises. "To deliver this agenda we need appropriate pharmacy premises, and I am convinced that even large multiples need to invest in improvement and expansions to their premises if we are to create the sort of space that these new responsibilities will require."

Mr Town wants to maximise the use of all the resources available and in particular to use

the skills of professional staff to maximum benefit. "This will involve many people having to re-visit many of the skills they learnt previously, but have perhaps not utilised for many years and to accept the need to delegate significant elements of their traditional role to technicians and assistants."

However, he was critical of the current requirement on pharmacy supervision. "We need to free up pharmacists' time and, indeed, hopefully train more pharmacists in the future" for the new roles. To do this "we do need urgently to change the supervision rules and allow an expanded role for technicians. This has been done for many years with hospitals [but] I think community pharmacy is well off the pace on this one, although I recognise that the current regulations are, to say the least, unhelpful."

"The vast majority of my colleagues have no idea what you currently do"

Chris Town

Home truths

GP contract will have major impact

The new GP contract will have a significant impact on the way pharmacists work, Dr John Chisholm, chairman of the BMA's General Practitioner's Committee, has warned.

"Not only will better use be

made of the skills of all primary healthcare professionals, but it is envisaged that pharmacists will have a greater role in the management of minor self-limiting illness, in prescribing, health promotion and chronic disease management.

"The new pharmacy contract must reflect those expectations and facilitate those enhanced roles," he said, speaking at his first major pharmacy conference.

He was supportive of pharmacy's position on the OFT control of entry report, saying: "It is important that the OFT report does not curtail the public's choice and access to local pharmacist advice and a personal service. The revision of the control of entry regulations will require great sensitivity, and must build on the highly constructive agreements previously reached between PSNC, the GPC and the Department of Health."

However, Dr Chisholm had two reservations about the new pharmacy contract. Referring to the similarities between the new GP contract and the proposed framework for the new pharmacy

contract, he said that he would prefer in the interests of equity that many of the additional services were negotiated nationally rather than locally, and added: "I would observe that the intention to introduce change from next

April is mightily ambitious."

Saying that he wished to see pharmacists as prescribers, and ETP introduced, he called for both a public and a professional debate on data sharing and the implications of the integrated care record service.

"It is important that the OFT report does not curtail the public's choice"

John Chisholm

Get out of dispensary, urge patients

No longer can pharmacists be remote figures who stand at the back of the dispensing area never talking to the people they are dispensing for.

Instead, pharmacists should be happy to talk to patients, to explain things and answer questions. "The pharmacist today needs to be approachable and indeed that is what the public seem to want," said Mike Stone, outgoing chief executive of the Patients' Association.

Setting out his association's opposition to the control of entry report, Mr Stone felt things should remain pretty much as they are. "We feel there is a vital role for the community pharmacist and this must be protected."

But there are many people who are not really aware of what the pharmacy is for beyond a medicines dispensing role, he said. "Patients must realise that the community pharmacist is a resource that can and must be used, otherwise one may see the

demise of such establishments which will be a great loss to the community."

Patients would like longer opening hours, he suggested, as some people cannot visit a pharmacy between 9am and 6pm because they are working. "Staggered opening hours are a necessity for many people."

People also want information

and areas where they can discuss confidential matters. He welcomed the introduction of screened-off consultation areas, but added that provision of seats for those waiting was also important, especially for the elderly and disabled.

While acknowledging that it is difficult to be "everything to everyone", he said it was useful to

find out whether what is being offered is what the public wants.

"Design a small questionnaire that people can fill out while waiting. You will find the feedback both interesting and informative," he advised.

"Publicise in the local community what you have to offer. Opening times are important, but so are the services you have to offer."

Wholesaler support for development

Martyn Ward, UniChem's sales and marketing director, agreed with Mike Stone that pharmacists need to be seen and "not buried – out of sight and out of mind – at the back of the dispensary".

"There is some confusion about what pharmacists do," he said. "There is a view in some quarters – particularly among GPs – that pharmacists are 'shopkeepers' rather than clinicians. There is also the view that we need to raise our game in terms of premises' layout and design and, in particular, through the provision of appropriate consultation areas. We also need to move toward a more patient-focused service."

He argued that to get to grips with the unprecedented changes occurring in healthcare, "it does not make sense to go it alone", and that there is plenty of help and support available.

UniChem's own Portfolio system of value added initiatives will mean that UniChem will be able to focus on commercial training in such areas as staff development, people management, health and safety and retail development. "The professional elements such as medicine, counter assistants and dispensing assistants will be available to UniChem customers through the NPA as part of the Portfolio discount vouchers redeemable against the cost."

Two years after C&D went to prison to report on Moss Pharmacy's smoking cessation service for young offenders in Scotland, I returned to see how Moss's prison service is developing

Dispensary manager Kirstie Hepburn (back left) and her staff

A two-year stretch

Prisons such as Glenochil (above) keep staff at the Livingston dispensary (below) busy with a "mind-boggling" workload

Since winning the Scottish Prison Service contract for pharmacy services in 1999, Moss Pharmacy, or to be more precise, its dedicated team of prison pharmacists and technicians, has engineered

something of a revolution in the way that pharmacy services are provided in Scottish prisons.

As a result, Moss now provides 15 of Scotland's 18 prisons with a pharmaceutical offering that includes clinical and professional services on top of the supply function. Such has been Moss's impact that its three-year contract with the SPS was extended by a further two years last November.

What the SPS wanted was a standardised service to replace the 'mish-mash' of locally negotiated services, says Pamela McGowan, Moss's prison contract manager. As well as improving the quality of pharmacy services, Moss can now provide the SPS with a breakdown of all the medicines dispensed according to *BNF* categories.

Prior to Moss's service, nurses were responsible for dispensing, a far from ideal situation, adds Pamela.

After winning the contract, Moss began pharmacy services in one prison and within the next three months enrolled further prisons at the rate of up to two per week.

As well as a dispensing service, Moss set about establishing a range of clinical and professional services in line with the prison authority's objectives of trying to educate and empower inmates so that they can cope when they return to the community, says Pamela.

A large, purpose-built dispensary based at UniChem's Livingston depot is the nerve-centre for Moss's prison service operation.

Led by dispensary manager Kirstie Hepburn, the staff – one full-time and three part-time pharmacists plus six full-time and one-part time pharmacy technicians

– dispense both acute and repeat medication for all the prisons.

The dispensary runs with clockwork efficiency, as the workload is mind-boggling.

It serves a population of 6,000 prisoners and medication is dispensed weekly. At prisons such as Glenochil, up to 60 per cent of prisoners are on regular medication.

Daily prescription requests feed into the dispensary via fax servers, and UniChem delivers all requests received in the morning to the prisons that day. (When UniChem's delivery drivers first arrived in their green polo shirts, they found their uniform matched that of the prisoners, and they had to change quickly lest the prison staff thought they were escapees.)

The dispensary positively hums with activity and is open from 8.30am to 6pm, five days a week, plus a half-day on Saturday. An out-of-hours package via pager service allows prison staff to get health advice as well as request emergency medication supplies.

Although SPS and Moss refuse to say how many prescriptions are dispensed each month, judging by the Livingston dispensary's six interlinked computers and two large central workstations, the prescription numbers are probably huge.

However, the prison environment does mean that there are some quirks to Moss's service. Although prisoners are encouraged to take control of ordering their medicines – as it improves compliance and self-esteem – medicines such as CDs, benzodiazepines, analgesics and antipsychotics are

supplied by the prison staff under supervision. The aim is to prevent prisoners from being bullied and having their medication stolen; particularly those drugs with overdose potential.

Also, liquid medicines are only supplied in plastic bottles, while tablets are placed in clear plastic bags without patient information leaflets. This prevents prisoners from 'developing' side effects and abusing the healthcare system, says James Taylor, healthcare manager at HM Glenochil Prison.

If you are locked up for extended periods, suggests James, boredom sets in and you inevitably find some way to wind up the system. But pharmacists are on hand, however, to counsel patients about side effects when they receive the medicines for the first time, says James, and posters are put up telling prisoners that they can request patient information leaflets at any time. Reassuringly, those who do request PILs do not abuse the system.

Overall, the aim is to empower and educate prisoners, says Kirstie, by moving away from a model where prisoners are supervised and towards an ideal where they can order their own medication. "[We are] trying to mirror a community pharmacy setting as much as possible."

James adds that many prisoners are homeless, with poor dental and mental health, and have poor compliance with their medicines, mainly because they have little knowledge of their medical conditions. "If you can get them to understand health issues, it improves their self-esteem."

According to James, the prison population's health is worse than that of the general population. Not only do prisoners tend to come from the lowest social class, they are also more likely to have asthma, diabetes, pain, and addiction. "They are health dependent and not healthcare independent," he says.

The variety of health clinics run in Glenochil reflects the needs of the prison population.

Currently there are 12 clinics on offer: asthma, diabetes, pain, vaccination, well man, blood borne viruses, dermatology, epilepsy, addiction, personal hygiene, disease management and health promotion. Some of these involve up to 500 inmates – Glenochil's entire population. Twelve nurses help to run the clinics, including four mental health nurses and an addiction specialist.

Patricia McAleer is one of Moss's three peripatetic pharmacists that provide the extended pharmacy services in the prisons. She visits all 16 prisons at least once each month but if there are specific health programmes to be undertaken, she visits weekly.

Along with Moss's two other peripatetic pharmacists – Karen Rowell and Alison Gillanders – Patricia runs clinics in health promotion and smoking

cessation, as well as answering prisoner's medical queries, liaising with other healthcare staff, and providing emergency medical stocks, such as antibiotics, insulin and depot antipsychotics.

"It's very much like running a nursing home except that patient needs are greater, particularly in terms of mental health and addiction," she says.

"[Prisoners] don't have huge awareness of their conditions and... compliance is non-existent."

As smoking is rife among prisoners – 90 per cent of prisoners and half of prison staff smoke, according to James – smoking cessation was an obvious choice to be one of Moss's first clinics. Following a pilot scheme run in HM Young Offenders Institute Polmont two years ago, there was a "huge demand" to develop it further, says Kirstie.

"As a result of that pilot, an opportunity came from the Health Education Board of Scotland [now NHSScotland] for funding," she says.

The remit was to look at smoking cessation in young people and Polmont was one of eight projects chosen. The three-year pilot, currently in its second year, consists of a 12-week programme with group and individual support backed by a smoking co-ordinator.

Results to date have been excellent, says Kirstie. "A lot of the young people want to give up smoking and, encouragingly, a number of prisoners are waiting to take part in the scheme."

Initial evaluations show a high success rate, with a quarter to a third of participants remaining nicotine-free after three months plus a high percentage cutting down "quite dramatically".

"Offenders have little to do because they're bored, so it's quite an achievement," says Kirstie. Part of this success is because participants could be considered a 'captive audience'. "It gives us good attendance, and the majority of patients stay in the group unlike in the community," adds Kirstie.

Prisoners taking part in the clinic also contribute to a review group. The level of commitment has been "fantastic...giving us good advice as to how to tailor the programme" says Kirstie.

Significantly, pharmacists have full access to patients' medical records and all clinical interventions including any patient counselling are entered.

Other successes have been an intervention scheme and a drop-in clinic. "About a year

ago, we began looking at documenting the interventions to demonstrate pharmacists' value and to tie in our work in the dispensary with the visiting pharmacists' work," says Pamela. Consequently, patients who need to be reviewed due to poor inhaler technique, for example, can be quickly identified and discussed at the health team's weekly meetings.

The drop-in clinic, says Patricia, began as a result of "people learning who I was and stopping me wherever they met me. It quickly became apparent there was a need for pharmaceutical care and we decided to adopt an 'individualised healthcare approach' to

reflect the community pharmacy approach, whereby pharmacists issue medicines and counsel patients at the same time." The clinic is held on Monday evenings and Patricia says that she can see up to 60 patients in a session.

According to James, Moss's input means, "healthcare now compared to healthcare a few years ago is chalk and cheese... it frees up the nurses' time so they can deliver care rather than medicines".

Helen Hilton, Glenochil's mental health team clinical manager, says she expressed trepidation when Moss began but that she now welcomes the input. She says Moss's role is vital as there are three things, which if not delivered on time, can take the "lid off the jail" and these are visits, food and medication.

As for Moss's pharmacy team, Patricia says that she would now find it difficult to go back to working in a branch. Pamela says the hard work has been worthwhile, while Kirstie says the most rewarding part is being part of a team of pharmacists.

"We're all still here and we're very proud of the services," she says. ☺

Patricia McAleer (left), one of Moss's three peripatetic pharmacists and Pamela McGowan, Moss's prison contract manager

THE ONLY REGULATED FIRM OF CHARTERED ACCOUNTANTS AND TAX ADVISERS SPECIALISING IN RETAIL PHARMACIES

Appointments

EAST SUSSEX HOSPITALS NHS TRUST aims to provide high quality hospital services for the people of East Sussex and serves a population of approximately 500,000. We employ around 5,000 staff and offer an excellent range of staff amenities.

The Trust provides a comprehensive range of general acute hospital services from two main district general hospitals, the Conquest Hospital in Hastings and the District General Hospital in Eastbourne.

East Sussex Hospitals NHS Trust Pharmacy Service Eastbourne District General Hospital

Eastbourne is a pleasant coastal town set in the South Downs, with easy access to London and Brighton. The pharmacy provides services to the Trust's acute beds and to other healthcare locations throughout East Sussex. The department is clinically orientated and progressive in outlook, with developing services. Modern accommodation is available on-site with associated hospital social facilities. Flexible working patterns are well established, so applications from job-sharers are welcome.

Pharmacy Technician

(MTO 1 / 2+++)

£12,415 - £15,069 (MTO 1)

£15,069 - £21,451 (MTO 2+++)

Ref: EAS 304EL

(Discretionary points awarded for Accredited Checking and Medication Management)

We are looking for an enthusiastic self-motivated qualified technician to join our friendly technician led dispensary. Our team of technicians provides a range of dispensary and ward based services including the medicine management scheme. You will be encouraged to undertake regional Accreditation Schemes to extend your role according to the strategy for the development for pharmacy technicians.

You will hold a BTEC in Pharmaceutical Sciences or equivalent and have good communication and interpersonal skills. Previous experience, although desirable, is not essential, as full training in every aspect of the post will be given. Newly qualified technicians and those without hospital experience are welcome to apply.

For further information or an informal discussion, please contact Ruth Chatterley (Principal Technician) or Elizabeth Norman (Senior Technician) on 01323 417400 ext.3567.

For an application from and job description, please contact the Human Resources Department, Eastbourne District General Hospital, Kings Drive, Eastbourne, East Sussex BN21 2UD. Tel 01323 414937 quoting the reference number.

Closing Date: 20th October 2003.

For details of other vacancies at East Sussex Hospitals NHS Trust, please contact the Human Resource Department on 01323 414937 or visit our website.

The Trust is committed to equality of opportunity
Job shares are considered for all positions.

Win a superb all-inclusive historic hotel break

This superb Pharmacy Travel Prize is arranged in conjunction with Warner Historic Hotels and offers a choice of three distinctive locations.

Littlecote House is a magnificent Grade I listed Tudor mansion where Henry VIII once wooed Jane Seymour. Today its mullioned windows, ivy clad walls and oak-panelled Great Hall create a stunning back-drop to a modern hotel. The quaint market town of Marlborough is just 10 minutes away and the cities of Salisbury and Oxford are nearby, as are Blenheim Palace (the birth place of Sir Winston Churchill) and Stonehenge.

Thoresby Hall (above) is an impressive Victorian country house with imposing state rooms, a unique ambience and

spectacular architectural design. The hall and its magnificent grounds both enjoy Grade I listed status. This part of the country is steeped in local history – Sherwood Forest is right on the doorstep (you must visit the excellent Sherwood Visitors Centre) and Hardwick Hall and Chatsworth House are within 45 minutes' drive.

Holme Lacy House enjoys an idyllic parkland setting with a tranquil lake close to Ross-on-Wye. The elegant façade of this Grade I listed country house evokes times gone by – you could be forgiven for thinking you'd

stepped into the pages of a Jane Austen novel. The nearby beautiful city of Hereford has an impressive 11th Century cathedral and other local places of interest include Eastnor Castle and Hampton Court Gardens in Leominster.

The prize is for a couple sharing a twin/double Ambassador Room and it can be taken any time between 01 February and 30 June 2004 (subject to availability). It includes accommodation for three nights, dinner, breakfast, sport/leisure facilities and nightly entertainment.

Rules 1 This competition is open to any pharmacist or permanent member of staff who works at an address which receives either *Chemist & Druggist* or *Community Pharmacy 2*. Competitors may enter through *C&D* or *Community Pharmacy*, but may only submit one entry. Double entry will disqualify both entries. **3** Entries must be on an original coupon from *C&D* or *Community Pharmacy*, and to be eligible for the prize entrants must correctly answer the question on the coupon. **4** The prize offered will be as stated. No alternative holidays or cash prizes will be offered. **5** Names of winners will be published in *C&D* and *Community Pharmacy*. **6** In any dispute, the decision of CMP Information Pharmacy Group's publishing director will be final and no correspondence will be entered into. **7** Employees of CMP Information Ltd, Travel Clubs International and trading divisions and their immediate families are forbidden to enter. **8** No purchase is necessary to participate. **9** The closing date for this month's competition is as printed on the entry coupon.

Data supplied to CMP Europe Ltd and CMP Information Ltd may be shared with any member of the United Business Media Group world-wide, associated companies and subsidiaries for the purposes of customer information, direct marketing or publication. Data may also be made available to external parties on a list rental or lease basis for the purposes of direct marketing. If you do not wish data to be made available to external parties on a list rental or lease basis, please write to the Data Protection Co-ordinator, CMP Information Ltd, Dept PH1649, FREEPOST LON 15637, Tonbridge, TN9 1BR or Freephone 0800 279 0357.

There's a sore throat treatment that can last longer than *dinner*, the kids' *homework* and a edtime story.

Strefen is clinically proven to reduce the symptoms associated with inflamed sore throats, providing rapid relief that lasts for up to 3 hours. They are the only lozenges to contain an NSAID (flurbiprofen) and have been shown to be well tolerated.¹ With a proven safety profile, Strefen is suitable for anyone suffering from sore throat pain to whom you would normally recommend an NSAID.

Recommend Strefen, because nothing is proven to last longer.

PRODUCT INFORMATION FOR STREFFEN® Strefen contains flurbiprofen BP 8.75mg per lozenge.

Indication: Symptomatic relief of sore throat. **Dosage and administration:** Adults and children over 12 years: 1 lozenge sucked slowly every 3 – 6 hours as required, up to a maximum of 5 lozenges in 24 hours, and for a maximum of 3 days. The lozenges should be moved around the mouth whilst sucking.

Contraindications: Hypersensitivity to any of the ingredients; in patients with existing, or history of, peptic ulceration; history of bronchospasm, rhinitis or urticaria associated with aspirin or NSAIDs.

Special warnings and precautions for use: Bronchospasm may be precipitated in patients with history of asthma. Caution is required in: patients with renal, cardiac or hepatic impairment as renal function may deteriorate with use of NSAIDs; patients with hypertension; patients with abnormal bleeding potential as bleeding time can be prolonged. **Pregnancy and lactation:** Use of Strefen should be avoided in the third trimester. Flurbiprofen appears in breast milk in very low concentrations and is

unlikely to affect the breast-fed infant adversely. **Undesirable effects:** Dyspepsia, nausea, vomiting, gastrointestinal haemorrhage, diarrhoea, mouth ulcers, fluid retention and oedema, exacerbation of peptic ulceration and perforation, urticaria, angioedema and various rashes have been reported rarely, jaundice and thrombocytopenia (usually reversible), aplastic anaemia, and agranulocytosis have been reported. Transient local irritation of the buccal mucosa may occur, and taste perversion has been reported in trials. **Package quantities:** Strefen is available in cartons of 16 lozenges. **MRRP:** £3.00 (16 lozenges). **Product licence number:** 00327/0135. **Product licence holder:** Crookes Healthcare, Nottingham NG2 3AA. **Legal category:** P. **Date of preparation:** August 2003. **Reference:** 1. Be SI et al. Efficacy and tolerability of the anti-inflammatory throat lozenge flurbiprofen 8.75mg in the treatment of sore throat - A randomised, double-blind, placebo-controlled study. Clin Drug Invest 2001; 21(3): 183-193. URT000251.

To receive copies of the pharmacist and pharmacy assistant sore throat management training manuals or a clinical paper summary, telephone 0115 900 1111.

BIGGER. BETTER. BRIGHTER.

ONLY one generic company has consistently been first to add the most important products to its ever growing high quality range.

Only one is part of a pharmaceutical group that has been in continuous activity for 300 years.

Only one is now the largest generic company in the UK.

And only one is committed to staying number one by being your first choice.

There are many generic companies, but there is only one Generics [UK].

Generics [UK] Ltd

Committed to being your first choice

Who makes what: a unique source list

The C&D Generics Supplement not only lists the seven-digit PIP Codes, so providing buyers with a unique source list for unbranded lines in pack sizes ranging from counter and dispensary to small-scale manufacture, but also lists the PIP codes which have been allocated to users for their own internal use.

The list is arranged so that users can trace alternative suppliers easily, and at the same time have the relevant PIP Code for ordering and product identification. Entries are updated in the weekly Price List Supplement when changes are notified to C&D by manufacturers. C&D would be pleased to receive details in writing, of any packs not currently listed and for which codes are required.

The following compilation rules have tried to be observed:

1. When the PIP code was converted from six to seven digits, a zero was placed before the old number, so retaining the existing check digit.
2. New PIP Codes are allocated randomly and start with the figure "1".

3. In the interest of continuity, priority in re-allocation of existing codes has been given to suppliers whose products carry the PIP Code on their packs.

4. Entries are generally under pharmaceutical name in order to bring all suppliers together for maximum buyer choice. However, counter packs will often be labelled with a popular synonym (eg Gee's linctus, Whitfield's ointment). A cross-reference has been provided whenever products are shown under a synonym in suppliers' lists.

5. The names of brands containing a single active ingredient are listed at the beginning of each ingredient entry as a cross reference in conjunction with the C&D Price List.

6. The "DT" symbol indicates Drug Tariff pack sizes, which have been taken from the March 2003 edition.

The PIP Code

History

The benefits of a common code for pharmacy products have been long recognised, and over the years various working parties recommended the creation of such a code. In 1982 the National Pharmaceutical Association, in conjunction with Benn Publications (publishers of *Chemist & Druggist*), created the PIP Code in which they now hold joint copyright. This move had the support of several major pharmaceutical wholesalers.

Definition

The PIP Code is a product identifying number which has been allocated to goods distributed through pharmacies. All types of products are included and every pack size and colour or other variation has its own unique PIP Code number. The codes are published alongside each product entry in the *Chemist & Druggist* monthly Price List and weekly supplements, ensuring that a readily accessible and up to date PIP Code reference is widely circulated.

Initially, a six-digit code was chosen for ease of keyboard entry, but demand for the PIP coding system has necessitated the introduction of a seven-digit code. The last of these digits is a check digit (see p5) to minimise errors in recording.

Uses

The individual computer systems operated by manufacturers, wholesalers and retailers can be interfaced to recognise the PIP Code, which therefore provides a common language. This enables the retailer to

retain a freedom of choice of supplier and makes it possible for all involved in the distribution chain to benefit from streamlining their communications and merchandise handling systems.

Initially the PIP Code was used mainly as an interface between retailer and supplier for the purpose of placing and receiving orders, and virtually all pharmaceutical wholesalers can now recognise PIP Code when transmitted electronically. However, within retail pharmacy it is used increasingly for stock control and point-of-sale data capture. Most computer bureaux handle PIP Code data for clients, and many EPoS and dispensary systems make use of the PIP Code facility.

Computer users who choose to adopt the PIP Code as the primary code for their systems can avoid the time and expense of maintaining their own database. This is a considerable advantage to smaller businesses and pharmacies which have only limited clerical resources.

Developments

Requests for further information on the Code's use, and licence applications etc, should be addressed to:

Mr Richard Maw
PIP Code Administrator
National Pharmaceutical Association
Mallinson House
40-42 St. Peter's Street
St. Albans
Herts AL1 3NP
Tel: 01727 832161

PIP Code principles

The Pharmaceutical Interface Products Code Regulatory Authority is the National Pharmaceutical Association, which takes advice from a technical panel representing retail and wholesale PIP Code users, plus *Chemist & Druggist* (who maintain the NPA's master PIP Code file).

The code is based on computer codes used to maintain the *C&D* Price Service but has been augmented to incorporate a number of product categories not considered appropriate for publication in the *C&D* monthly Price List (such as some watches, confectionery, stationery).

Code users may find the following points of policy helpful:

General

1. Manufacturer and distributor codes are published in Section 2 of the *C&D* monthly Price List.
2. Within the seven-digit PIP Code, codes have been reserved for users' own requirements (see para 12), but some wholesalers have allocated part of the series to "service" items such as bags and bottles. Retailers should obtain details of such allocation from their usual suppliers before using this series as dump codes etc.
3. Discontinued items are deleted from the *C&D* Price List upon notification by the manufacturer but remain on the master file for reference. If a product is re-marketed by the same supplier within that period, every effort is made to use its former code.
4. Where there are minor adjustments to pack sizes the existing code is generally retained to help retailers monitor sales performance. When the trade unit alters there is no requirement to issue new codes.
5. Both branded and generic product codes can be issued in advance of product launch with full security and confidentiality. The allocated numbers are reserved on the *C&D* computer pending advice of launch. Manufacturers of ethicals are particularly asked to use this facility so that codes can be notified on their standard letter to wholesalers. Intercontinental Medical Statistics (IMS) and *Chemist & Druggist* have available a joint form (approved by ABPI and BAPW) for prior allocation of both SDA and PIP codes. *C&D* has its own PIP Code allocation request form for use by manufacturers who do not require a SDA code.

Variants

6. Products which have no variants (colour, flavour, etc.) are identified by a separate "main" code for each pack size, representing singles wherever possible. This code appears immediately before the trade price column in the *C&D* Price List.
7. Where products include variants the "main" code does not appear - instead there are individual codes in italic type beneath the entry. However, the "main" code is allocated to a variant (e.g. neutral, normal, white, original, small etc) in order to reduce confusion for code users.
8. Where variants are added to an existing range the "main" code will normally be retained as the variant code for the original version. If this variant is subsequently discontinued its code will remain the "main" code but will no longer be published.

Special cases

9. PIP codes for unbranded products are shown in the *C&D* Generics Reference Book, distributed free to all *C&D* subscribers, additional copies are available on request. This supplement also lists wholesalers accepting PIP Code for ordering purposes, Generic Suppliers and Disallowed Dressings and Appliances section.

Note: Branded generics (ie, where a prescription calling for the brand name alone is sufficient to identify absolutely the product required) are to be found in the *C&D* Monthly P. L. Branded products with a single generic ingredient are listed in the generics book under the generic name.

10. Certain surgical/sundries groupings are at present not fully covered by PIP Code. This applies particularly to products where the multitude of size and type variations is great and/or product developments are frequent, so that retailers are likely to rely on manufacturers' product number or full description for ordering from a wholesaler. However, some of the more standard and frequently prescribed brands and generic items (eg many NHS appliances) are coded in the *C&D* Price List and the Generics Supplement.

11. Products with an HP indication are packs and preparations only supplied to hospitals. Products are coded if manufacturers anticipate them being prescribed to out-patients.

12. Promotional products are coded using the 500-000 series. The categories for coding are 'Banded packs'; 'Price Marked packs' & 'counter/merchandise units'. These products are listed at the back of the supplement, and cumulate through the month before appearing in the back of the monthly price list. Temporary and seasonal packs are not coded by *C&D*. Codes within the 600-0000 & 850-000 to 899-999 are used by wholesalers etc., in accordance with the batches allocated to them by *C&D*, for their internal use. Retailers should use the 900-0000 series.

PIPCODE
012-3450**

Check-digit calculation

The check (seventh) digit of the PIP Code is arrived at by using the following calculation:

1. Take each digit starting with units position then tens position and so forth and multiply by 1,2,1,2,1,2, etc.
2. Add up resultants of 1. (Add the digits not the products ie if resultant is two digits then add them together).
3. Subtract the figure at 2 from the next highest multiple of 10.
4. Answer is the modulus 10 check digit. If no remainder then check digit is zero.

To check

1. Take each digit (including check digit) and multiply by 1,2,1,2,1,2 (starting in units position).
2. Total resultants as before.
3. Answer should be an exact multiple of 10.

Example

$$\begin{array}{rcl}
 & 3 & 5 & 8 & 9 & 2 & 5 & \text{(original number)} \\
 \times & 1 & \times & 2 & \times & 1 & \times & 2 & \times & 1 & \times & 2 & \text{(multiplicands)} \\
 = & 3 & 10 & 8 & 18 & 2 & 10 & \text{(resultants)} \\
 = & 24 & & & & & & \text{(sum of digits)} \\
 & 3 & + & 1 & + & 0 & + & 8 & + & 1 & + & 8 & + & 2 & + & 1 & + & 0 \\
 & 30-24 & & & & & & \text{(subtract from next multiple of 10)} \\
 = & 6 & & & & & & \text{(this result is the modulus 10 check digit)}
 \end{array}$$

Check

$$\begin{array}{rcl}
 & 3 & 5 & 8 & 9 & 2 & 5 & 6 & \text{(PIP code number)} \\
 & 3 & 10 & 8 & 18 & 2 & 10 & 6 & \text{(resultants)} \\
 = & 30 & & & & & & \text{(sum of digits)} \\
 = & 0 & & & & & & \text{(correct - exact multiple of 10)}
 \end{array}$$

Coding queries

Coding queries related to products published or to be published in the C&D Price List and Generics Reference Book should be addressed to Colin Simpson, Price List Controller, Chemist & Druggist, CMP Information Ltd, Sovereign Way, Tonbridge, Kent TN9 1RW (telephone 01732 377407).

Queries relating to codes held on the master file should also be addressed to Colin Simpson at the above address.

Matter of policy should be referred to Mr Richard Maw, PIP Code Administrator, National Pharmaceutical Association, Mallinson House, 40-42 St. Peters Street St. Albans Herts AL1 3NP (telephone 01727 832161) from whom, for NPA members printouts of the master file in alphabetical or numerical order may be purchased. Non-members can apply to C&D direct.

The PIP Code copyright is owned by CMP Information Ltd (publishers of *Chemist & Druggist*) and the National Pharmaceutical Association is the licensed administrator.

Technical panel

The PIP Code technical/consultative panel, set-up by the National Pharmaceutical Association to advise it on code maintenance and development, is chaired by Mr Richard Maw of NPA and has the following members: Sonia Garner (NPA information department), Colin Simpson (C&D Price List Controller, responsible for maintaining the PIP Code master file, the issuing of PIP Codes and their publication through C&D Price Services), Patrick Grice (Editor of *Chemist & Druggist* magazine), Darren Larkin (representing C&D Price Service), Andy Charlesworth (representing Numark Ltd), Nick Jones (representing Gehe UK), Devyani Patal (representing UniChem plc), David Houghton (hospital representative), Col Michaels (independent retail pharmacist), Craig Spurdle (representing Phoenix Pharmaceuticals).

Recommended International Nonproprietary Names

This publication shows the new names brought about by the implementation of the *European Community Directive 92/27/EEC*, which has been consolidated and is now *Directive 2001/83/EC*. These Directives authorised the use of RINNs in the labelling of medicines throughout the EC.

For further information refer to the MHRA web site at www.mhra.gov.uk

The *Chemist & Druggist* Monthly Price List and Weekly Price Supplement are available electronically. The database and update services are available in the form of either a complete; partial or customised database; according to preferred product classifications. They are intended for wholesalers and EPoS suppliers for onward transmission to clients. For further details of costs and formats please ring 01732 377407/457, or fax 01732 377559 price list section.

PIP CODES FOR WHOLESALER/DISTRIBUTOR INTERNAL USE

1. The 600-0000 & 850-0000 to 899-9999 series of codes are available for internal use by wholesalers/distributors under the control of the C&D Price Service.
2. **C&D** Price Service will issue wholesalers/distributors with blocks of codes from within the 600-0000 & 850-0000 to 899-9999 series on request. Those codes will be exclusive to that wholesaler or distributor.
3. Wholesalers will issue and maintain codes for their own internal use from within the blocks issued to them by the **C&D** Price Service. When that block is used up they should apply to **C&D** for a further block.
4. Code blocks issued to each wholesaler/distributor will be published in the Generics Guide twice yearly and will be available on request from **C&D** Price Service.

5. PIP Code users and IT systems suppliers should refuse to accept PIP codes from any wholesaler/distributor that are outside their allocated block, and refer the originator to the C&D Price Service for a code block allocation.
6. In due course, administration of the 700-000 & 800-000 to 849-9999 series codes will revert to the **C&D** Price Service. Wholesaler/distributor generated codes which are within the 700-000 & 800-000 to 849-9999 series will no longer be recognised. Any product codes from these series that are still live should be recoded using a code from within the block issued. At least six months notice will be given.

At the beginning of some of the generic entries there is a further list of names in bold capital letters.

These names are of the brands which contain the single generic ingredient under which they are listed.

This information is to allow for easy cross referencing with branded equivalents in the main C&D Price List.

Anitriptyline (Rosemont Pharms)

oral solution 25mg/5ml

DISALLOWED DRESSINGS AND APPLIANCES

A guide to both proprietary and non-proprietary items for which payment will not be made if dispensed against NHS prescriptions issued in England and Wales. Derived from the lists used by the PSNC Prescription Research Centre it includes extensive cross-referencing for quick access to particular products.

listening

We're making our packaging even more accessible

We take your views very seriously. So we are refining the look of our cartons so they are easier for you and your customers to use.

- Enlarged product names
- Clearer end panels, for clarity on the shelf
- Twice as many colours, making each product and strength more distinctive
- Statutory warnings and route of administration notices, as per labelling best practice guidelines (MLX275)

We are listening. To find out more, talk with your AlphaPharma representative, visit our website at www.accessiblemedicine.co.uk or call us on 01271 311200. As you would expect from the UK's leading manufacturer of solid dose generic medicines.
